DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The prior art of record fails to anticipate or make obvious the structure of claims 8 and 9, including, *inter-alia*, providing a protective cover for a pressure sensing system that faces the sensing surface when a device's case body has been slid to a waiting position where the sensing surface does not face an insertion hole for measurement.

Chesney (US Patent 6132383) in view of Villa-Real (US Patent 4320767) discloses a pressure sensing system with a protective cover, where the pressure sensing section may be slid to a waiting position, but does not disclose the sensing surface facing away from an insertion hole when in a waiting position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
